

NEIL WALLIS

Experienced in creating memorable, pragmatic architectural solutions that respond to site and program constraints and challenges of multi-layered owner representation. | Adept at initiating projects both as a collaborator and solo from start-up conditions | Led teams of up to 12 designers from schematics through contract documents | Has developed strategy, created exhibit materials, and delivered successful client presentations on high-profile projects | Experienced in a variety of delivery models including Integrated Practice and Lean Construction in conjunction with owner representatives

PROJECT SKILLS

Proficient in digital design and communication as well as hand-sketching; conceptual 3D modeling; computer-rendered visualization; BIM (Revit) | High level of technical competency enables rapid coordination of architectural design with other disciplines | Experience in contract documents, budget management, and contract administration underpins a knowledge of construction costs and methods to achieve better integration with pre-construction activities | Efficient in staff and time resource management
